HOURS OF OPENING:

DAYS 1 & 2: 9.00 A.M TO 5.00 P.M - DAY 3: 9.00 A.M TO 4.00 P.M

SPINCLUB LOS ANGELES presents the Western U.S. textile industry with 45 exporting spinning mills and knitwear manufacturers selected for the quality of their products and services.

These sourcing days enable American buyers to interact with their leading suppliers on their continent.

33 spinners and 12 knitwear manufacturers will present the best-sellers of their Fall/Winter 2025-26 collections in a space organized by SPINEXPO™, in collaboration with The Textile Show, at the Cooper Design Space in Los Angeles on September 24-25-26, 2024.

For the first time since SPINEXPO™ was launched, this range of yarns and knits has been expanded to include coordinating fabrics, lodens, herringbones, and wool velvets.

These products are manufactured exclusively in our exhibitors' factories.

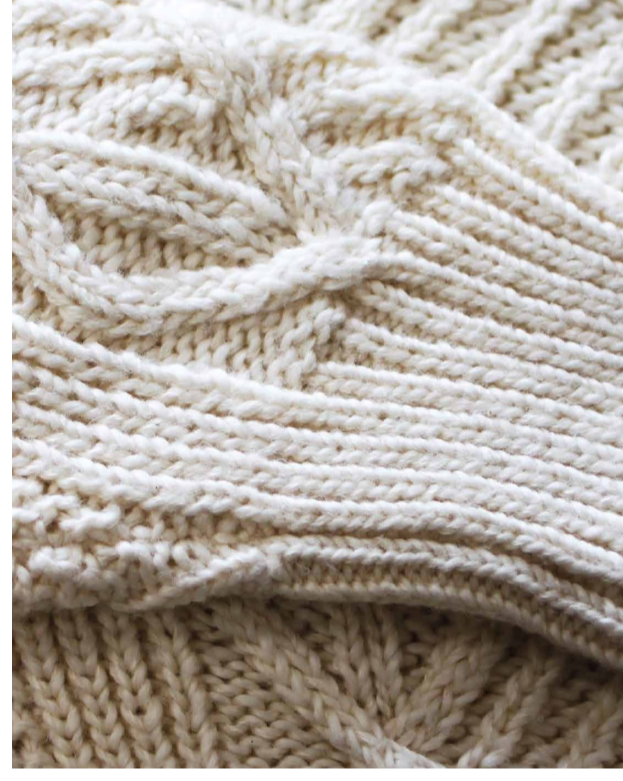

KNITTERS' PROFILES AT THE SHOW

THE KNITTERS' OFFERINGS FOR AUTUMN/WINTER 2025-26 SET THE TONE FOR A WARM SEASON, WITH HIGH-QUALITY MATERIALS AND LUXURIOUS FINISHES CONTRIBUTING TO CREATING SOFT, SENSUAL KNITS.

THIS TREND EMBODIES SUSTAINABILITY AND QUIET LUXURY:
A MORE SUSTAINABLE FASHION PERSPECTIVE.

FLEXKNIT

FLEXKNIT is a knitwear manufacturer based in Madagascar that approaches knitwear playfully and experimentally.

Why Madagascar? Because goods are duty-free to Europe, the USA, Canada, Japan, and South Africa, the country's water quality and low humidity make it an excellent spot for manufacturing products made from high-end sensitive fibers, such as cashmere.

FLEXKNIT has 3000 workers, 1800 in Tana and 1200 in Antsirabe. Still, it also has its dyeing facility, which can offer diverse dyeing effects for raw materials it always has in stock. It also sources top-dyed yarns from quality suppliers in Africa, Asia, and Italy. The dyeing mill specializes in high-quality dyeing of cotton, wool, viscose, and various blends. GOTS, OCS, and RWS certificates.

FLEXKNIT is flexible and can work with different yarns/gauges and play with the structures to fulfill their customers' wishes. They offer many modern technology services (machine embroidery, rubber print, patch application, flocking, hotfix, and sequins application) in addition to traditional hand-knitting techniques. The country has the best workers with high skills in hand embroidery and crochet.

FLEXKNIT has an immense experience with all basic knitting structures such as tuck, waffle, honeycomb, jersey and heavy jersey, shaker seed, ripple, rickrack, rib, pineapple, moss, Milano, mesh pattern, herringbone, garter, faggot, embossed knitting, cable, jacquard and many more.

The Quality Control and Assurance Department lies at the core of the company's operation and is responsible for meeting all clients' standards.

ANDARI

ANDARI is nestled in the heart of Los Angeles.

Established in 1991, Andari has provided local and overseas knitwear manufacturing services for over 30 years in the U.S. and has served hundreds of customers, helping them bring designs to life.

Harnessing both 3D knitting and fully fashioned capabilities and working with highly skilled design and operations teams, their expertise shines through in development and production, delivering high-quality, reliable products. They recognize that not everyone possesses technical knowledge in knitting, yet many harbor incredible ideas and designs that they wish to bring to fruition. This is where they offer their assistance. They begin by closely collaborating to comprehend clients' product vision, objectives, intended audience, and distinctive selling propositions.

Crafting a tech pack from the ground up, they can help source materials that match requirements and offer informed suggestions on fitting and grading. Andari's seasoned team is by your side throughout this intricate process, helping you navigate the complexities of converting an idea into a tangible, market-ready piece.

They leverage their expertise to ensure the final product aligns with the client's vision and business objectives.

As one of the United States' leading private-label knitwear manufacturers, they have always been unwaveringly committed to local and sustainable production. They ensure products swiftly reach consumers, empowering brands to adapt to shifting trends and evolving consumer preferences.

The factory operates on solar energy, holds SEDEX certification, and is a proud member of the BCI Cotton platform.

Andari has embraced cutting-edge seamless 3D knitting technology. This innovative approach creates knitwear in one piece, minimizing labor and yarn consumption compared to traditional methods. The end products increase durability and reduce waste. Customization allows consumers to tailor clothing to their preferences, ensuring a unique and individualized experience. They become co-creators in the design process, fostering deeper connections between consumers and your brand and driving loyalty and satisfaction. On-demand manufacturing mitigates the risks associated with inventory. Gone are the days of producing substantial volumes of diverse styles. The products are designed, sold, and made-to-order. This dynamic approach slashes inventory-related expenses and minimizes warehousing costs and environmental impact, reducing carbon footprint.

Sample Lead Time: 3 weeks
Production Lead Time: 4-6 weeks (excluding yarns)
Minimum: 300 units/style (2 colors & 4 sizes)
